Art Unit: 1794

1. Claims 5, 17 and 20 are objected to because of the following informalities: In claims 5, 17 and 20, line 1, "of a" should be changed to ", of the" and line 2, "of" should be changed to ", of a". Appropriate correction is required.

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 8 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 8 is indefinite in reciting "step 8 (a)", which can be corrected by changing "8" to "7". Claim 17 is indefinite in not reciting to what "a dark portion and a white portion" refers. Corrections are required without new matter.
- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1-8, 10-18 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gundlach et al (5,925,400, col. 19, lines 5-18) in view of Leidy et al (3,840,677, col. 3, lines 30-33 and col. 7, lines 59-65) or Sienkiewicz et (4,162,332, col. 6, line 54 to col. 7, line 27). Gundlach et al discloses preparing turkey bacon by coextruding dark and light comminuted turkey into alternating layers of dark and light, heat processing and/ or smoking, combining with flavoring agents, chilling and slicing into strips. It would have been obvious to fry the sliced strips in Gundlach et al to

Application/Control Number: 10/774,304

Art Unit: 1794

prepare the turkey bacon for consumption since it is well known to fry simulated sliced bacon strips for consumption, as evidenced by either secondary reference. Further, it would have been obvious to chill and later reheat any leftover turkey bacon (claims 2 and 3) since treatment of leftover meat products in this manner is conventional. Finding the optimum frying parameters, the optimum amount of flavoring, the optimum heating conditions, the optimum percent of dark and light turkey and the optimum number and size of each slice or strip (claims 4, 5, 7, 11-16, 18 and 20) would require nothing more than routine experimentation by one reasonably skilled in this art.

Page 3

- 6. Claims 9 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gundlach et al in view of Leidy et al or Sienkiewicz et al as applied to the claims above, and further in view of Kunert et al or Kazemzadeh. It would have been obvious to grind the turkey bacon prepared in the process of Gundlach et al, as above modified, into bits since it is well known to prepare bacon bits for seasoning on salads and soup, as evidenced by either Kunert et al or Kazemzadeh.
- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Keszler shows preparation of simulated bacon products from poultry starting materials.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arthur L. Corbin whose telephone number is (571) 272-1399. The examiner can normally be reached on Monday-Friday from 10:30 AM to 8:00 PM.

Application/Control Number: 10/774,304
